

TOA Agent Build Day — Cheat Sheet

Wicked Smart Agents: pick a lane, pick your models, ship a skill. · Sat June 27, 2026 · Fort Point · github.com/holzerjm/AgentDay-Example

Pick your project

Project	Theme	Lane	Diff	Offline	You'll learn
fridge-whisperer	everyday	L1	1	fully	the agent loop + skill templating
dungeon-mastah	fun	L1	1	fully	tested scripts (real dice), memory
wicked-smaht-bahtendah	fun	L1	1	fixtures	defaults-not-menus, API fallback
qrious-citizen	social good	L1	2	fixtures	multi-tool loops, real open data
storm-ready	social good	L1	2	fixtures	two-step APIs, degrade gracefully
paypah-trail	everyday	L1	2	fully	deterministic scripts > willpower
skill-forge	wildcard	L1	2	fully	the spec, by building a skill-maker
model-matchmakah	wildcard	L1	2	partial	cascade routing with cost receipts
chief-of-stuff	chief of staff	L3	3	yes	multi-agent delegation + routing

Five commands (zero keys, local model)

```
git clone .../AgentDay-Example && cd AgentDay-Example
uv sync
ollama pull granite4:micro
uv run python tests/manual_loop_smoke.py → SMOKE PASS
uv run python projects/<theme>/<name>/agent.py "your task"
uv run python -m agentkit.evals projects/<theme>/<name>
```

Five failure modes to dodge

Vague instructions · menus instead of one default · SKILL.md that blows the context budget · skipping evaluation · no model-selection rationale.

Day-of timeline

9:30 Setup check — model service up, skills-ref installed
10:30 **Lane 2: tag your baseline** (sacred — before any change)
by lunch Write 2–3 evals; flip to eval-driven iteration
3:00 Kill list — cut anything not serving demo + rubric
5:00 Commit freeze — skills-ref validate, README, push

Rubric (100 pts) — read it backwards

25 Shippability — runs from README, validate passes, public + OSI license
20 ADLC — worksheet + ≥ 1 evaluate/observe loop (benchmark.json)
20 Model Selection — written rationale + measured cost/latency/quality
20 Lane Merit — L1 end-to-end / L2 same-input delta / L3 delegation
15 Skill Quality — triggers, defaults, gotchas, template, eval delta
